

## SYSTEM MANAGEMENT TOOL AND METHOD

5

### Abstract of the Disclosure

A system management tool (10) includes an input system (12). An electronic library (14) is connected to the input system (12) and includes a process diagram (16) for modeling a system. An evaluation system (18) is connected to the electronic library (14). A corrective action system (20) is connected to the evaluation system (18). An assessment and analysis system (22) is connected to the corrective action system (20). The assessment and analysis system (22) measures and documents a corrective action.
